Chitr Lilavivat graduated in Civil Engineering with Geophysics background at Enfield College in London, and worked in the UK with GLC and Trafalgar Group Company in building construction until he became a Chartered Engineer. Then, he traveled on construction projects in the Middle East, China, Australia, South America and finally settled down back in Thailand with some 35 years of construction experience in the building industry. Chitr has also spent time in writing technical papers and teaching at various universities for project management. As he have been active in Asian region, ICE in London has made him the ICE representative in Thailand for the past 10 years to train young engineers and set examination for them to become Chartered Engineer.
