

GEM Building Taxonomy Report

Eric Lehmkuhl

Picture not available

Taxonomy string:

DX /MCF+CLBRS /+DNO /DY /MCF+CLBRS /+DNO //FC+FC2+FWCN /FOSN

Material type (DX):

Masonry, confined

Material technology (DX):

Fired clay solid bricks

Material type (DY):

Masonry, confined

Material technology (DY):

Fired clay solid bricks

Type of lateral load-resisting system (DX):

Other lateral load-resisting system

System ductility (DX):

Non-ductile

Type of lateral load-resisting system (DY):

Other lateral load-resisting system

System ductility (DY):

Non-ductile

Floor system material:

Concrete

Floor system type:

Cast-in-place beam-supported RC floor

Floor connections:

Floor-wall diaphragm connection not provided

Foundation system:

Shallow foundation, with no lateral capacity

Countries:

Uganda

Summary:

This type of construction is used for all types of buildings
